Forecast for Thursday 28 Apr 2022

Weather: A chilly start with any early valley mist quickly clearing to leave a dry morning with some long sunny intervals. Some fair weather cloud will build mid-morning onwards giving a cloudier but still dry afternoon, with cloud bases staying clear of the summits.

Chance of cloud-free hill tops above 800m: 100%.

Low Cloud and visibility: Early valley mist may give briefly locally poor visibility around dawn, otherwise cloud bases should remain clear of summits with good visibility at all levels.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Layers are recommended as even with light winds it will still feel close to or below freezing on the summits. UV levels may be strong in any sunshine on the higher routes, and sun protection is advised.

Forecast for Friday 29 Apr 2022

Weather: Another chilly start to the morning, with some patches of valley mist and shallow fog. These will quickly clear to leave another dry day with often sunny skies and with cloud bases holding clear of the summits.

Maximum wind: Easterly 15mph.

Chance of cloud-free hill tops above 800m: 100%.

Low Cloud and visibility: Early valley mist and shallow fog may give briefly locally poor visibility around dawn, but cloud bases should remain clear of summits with good visibility at all levels.

Temperature: **Valleys:** Zero Celsius becoming plus 15 Celsius by mid-afternoon.
At 800m: Plus 2 Celsius.
Freezing level: 1000m at first rising slowly through the day.
